

FIG. 11 is a schematic diagram of a second embodiment of a medical device. The device is shown in a perspective view, highlighting its curved, elongated shape. It features a central body with rounded ends. Various components are labeled with reference numerals: 110, 113, 114, 115, 116, 117, 118, 119, 121, and 130. The device has a small circular feature at the bottom left. The overall structure is designed for medical use, possibly as a catheter or a similar instrument.
